

QUARTERLY VISUAL STORM WATER OUTFALL DISCHARGE EXAMINATION

Instructions: This inspection record should be completed for each outfall every quarter. This sheet will be placed in Appendix 7 of the SWPPP once completed. Visual examinations of storm water samples will be made within the first 30 minutes of discharge from a storm event greater than 0.1 inches in magnitude which occurs at least 72 hours after any previous event of 0.1 inches or greater.

Inspector: _____ Date: _____ Quarter: _____

Nature of Discharge (rain, snow melt): _____ Rainfall Amount (inches): _____

Sample Description: _____ Location: _____

Outfall no:							
Time of sample:							
Color (none, milky, brown, etc.):							
Odor (petroleum, organic, etc.):							
Clarity (cloudy, clear, etc.):							
Floating solids (yes/no and describe):							
Suspended solids (yes/no and describe):							
Settled solids (yes/no and describe):							
Foam (yes/no and describe):							
Oil sheen (yes/no and describe):							
Other indicators of storm water pollution:							

Further descriptions and comments should be attached on a separate sheet of paper.
